

Build a comprehensive national oral health measurement system

NATIONAL TACTICS

STATE TACTICS

Support release of first comprehensive national survey and report of nation's oral health

Provide grant support to targeted states building model measurement systems

Support policy change to ensure sustainable financing model for collection and analysis of data, and a national repository of data

Identify and engage state partners to develop a framework for submitting, analyzing, and reporting state disaggregated data to state and national measurement repositories

Support policy change to integrate medical and dental records

Identify and engage national partners to analyze and report nationwide disaggregated data

Engage national partners to assess and monitor where states stand on adherence to measurement strategy

Engage national partners to develop and build consensus on core set of measures with sufficient granularity and a measurement and reporting strategy
